DESCRIPTION

W Rover Mini Cooper Sport in the last edition colours of Solar Red and Silver. It has the silver and black leather seats and alloy effect dashboard. This very bright and exciting Mini Cooper has been well maintained throughout its life. I bought it 9 years ago and the car received some replacement panels due to corrosion on the seams. I then sold it to a collector who has a number of classic cars and it has been professionally stored and for the last 9 years has never seen rain! He has had it moted every year and it has been regularly run. It has had no paintwork in the last 9 years and looks great today. It drives very well and has a smooth and precise gearbox. The car is mainly standard other than a newer cd radio and a great sounding stainless steel exhaust. It has covered 54850 miles from new and I have a thick history file to support this as well as the original book pack and both sets of keys. This is a great looking last edition Cooper Sport which the new owner will enjoy polishing and driving. Free delivery to your door in my curtain sided van within 200 miles of Tiverton.
